

Press Release

16 March 2011

Turbotec Products Plc
(“Turbotec” or “the Company”)

Trading Update

Turbotec Products Plc (TRBO.L), the designer and manufacturer of high performance, high quality heat exchangers and Tru-Twist® heat transfer tubing, today announces the following trading update in advance of its year ending 31 March 2011.

The Company expects results for the year to 31 March 2011 to be slightly ahead of market expectations. In the past five months, the Company has seen growth in unit sales volumes as well as increased selling prices arising from higher raw material costs, which have been passed on to customers in line with agreed contracts.

These results have been achieved despite the costs relating to the Company’s move to its new manufacturing facility in Hickory, North Carolina. Looking forward, the Company expects increased pricing pressure due to signs of growing competition in the market.

The Company also announces that Robert Lowe has been confirmed as Non-Executive Chairman as of 24 February 2011.
