### **Turbotec releases White Paper on Ozone friendly refrigerants with POE Oils.**

Turbotec Products, Inc. a world leader in high performance heat exchangers announces a white paper addressing Ozone friendly refrigerants, such as R410a and its associated POE oils, and the new challenges in system design, manufacturing, cleanliness and fluids handling.

With the phasing out of conventional CFS's and HFC's, R410a will become a prevalent choice as a replacement for R-22. The need to understand the special handling that these refrigerants require will be a necessity as the qualities of these refrigerants are understood.

The white paper is available on the Turbotec website in both the literature section and with Enviro-Pak, Residential /Light Commercial and Enviro-Temp Commercial/Industrial Heat Recovery products.

Turbotec, a world leader in enhanced heat transfer technology, manufactures a diverse range of high performance heat exchangers for virtually any space conditioning or refrigeration application in the biomedical, geothermal, water heating or heat pump markets. Turbotec tubing offers dramatic increases in heat transfer efficiency- providing up to 4 times the efficiency of smooth tubing and can be shaped into virtually any space saving configuration.

For additional information, contact Turbotec at (860) 731-4216, (800 394-1633 outside of Conn.) or visit us on the web at [www.turbotecproducts.com](http://www.turbotecproducts.com).
