Release Date: For Immediate Release

NEW TURBOTEC WEBSITE HIGHLIGHTS HEAT TRANSFER SOLUTION CAPABILITIES

Turbotec Products, Inc. a world leader in high performance heat exchangers, unveils a new company website. The updated website with an easy-to-navigate design offers comprehensive product information, specifications and literature for the company's complete line heat transfer and heat recovery products. Also added are new sections including FAQs, Market/Application Solutions, News and Investor Relations.

A more extensive Enviro-Pak Heat Recovery Systems section is available to service both visitors and clients. An Energy Savings Calculator is available for download in order to establish energy use, savings, and "return on investment". New accompanying literature is available for print.

Enviro-Temp Commercial Heat Recovery now includes an accessible technical presentation as well as an Energy Savings Calculator under development.

"The redesign makes Turbotec a centrally accessible information hub that we can all benefit from ", says Floyd Lewis, Director of Sales and Marketing. "Our employees and clients alike make frequent use of our site where answers to many common questions can be found."

Turbotec, a world leader in enhanced heat transfer technology, manufactures a diverse range of high performance heat exchangers for virtually any space conditioning or refrigeration application in the biomedical, plumbing, water heating or aerospace markets. Turbotec tubing offers dramatic increases in heat transfer efficiency- providing up to 4 times the efficiency of smooth tubing and can be shaped into virtually any space saving configuration.

For additional information, contact Turbotec at (860) 683-2005 x134 , (800 394-1633 outside of Conn.) or visit us on the web at www.turbotecproducts.com.
